

# Peachy Clean

## Brow Lamination Care

### Pre Appointment:

- Make sure you have filled out the online form that can be found in the FORMS section of my website.
- It is best to come with **CLEAN** brows to your appointment. Any makeup on or around the brows will be wiped off prior to your service but **clean brows will have the best results.**
- Shower and workout **before** your appointment if possible, as you cannot get the brows wet for **24 hours** post treatment.
- You cannot have a brow lamination if you have recently had any chemical or laser treatments, microneedling, dermaplaning, microblading, or used any products/prescriptions that may cause the skin to be more sensitive. **Please make sure you have filled out your form correctly and honestly to avoid any negative reactions from the treatment.**

### Post Appointment:

- **DO NOT GET YOUR BROWS WET FOR 24 HOURS.** This includes any heavy sweating.
- **KEEP YOUR BROWS CLEAN FOR 24 HOURS.** Do not apply brow makeup, face makeup, makeup remover, face wash, makeup wipes, oils, lotions, creams, or serums.
- **I recommend sleeping on your back for the first night after your service.** The brow hairs are still malleable for the first 24 hours. Side and stomach sleepers will want to sleep on their backs to avoid any misshaping of the brow hairs..
- After 24 hours, keep in mind that excessive use of oily cleansers, makeup removers, wipes, etc. can cause the brows to relax prematurely. **Try to use oil free products and be gentle.**
- Please keep in mind that you cannot have another Brow Lamination for at least **6-8 weeks.** This ensures that the hairs are not being overprocessed and stay healthy.
- Post treatment you should be able to brush the brows with a mascara wand each day and go! After the initial 24 hours, you can apply brow products if you would like.
